THE USA DIGITAL ROAD TRIP COMPANION

40 OFFLINE ROUTE MAPS

Take the road with you.

Selected scenic drives across the United States

Real road traces. Numbered route points. Practical notes for planning your next drive.

2027 EDITION / DOWNLOAD + PRINT

Keep a clear view of the route

Download this PDF before the trip. Each route has its own map and practical planning card.

Read the route first

Find the drive in the index. The orange line follows the selected road corridor, while numbered route points follow the order listed beneath the map.

Use the matching planning card

The page after each map gives the road corridor, season and access notes, services and any suggested alternate. Orange diamonds refer to the stops listed on that card.

Make an offline travel set

Save the maps, your daily plan and booking confirmations on your device. Print the pages you expect to need and keep them together.

Check conditions before driving

These maps help you plan the route. Use the linked road or park authorities to confirm current access, closures and reservations. Dates in 2027 are not a guarantee that a seasonal road will be open.

Match the route to your vehicle

General driving estimates exclude stops and delays. Road traces do not establish clearance or access for an RV, trailer or oversized vehicle; check the relevant authority for your vehicle.

Map data: © OpenStreetMap contributors, available under the Open Database License. https://www.openstreetmap.org/copyright. Base geography: Natural Earth (public domain).

ROUTE 01 / PLANNING CARD

North Cascades Highway

Use with the preceding route map.

THE DRIVE

Follow the Skagit River into forested mountain valleys, then cross the North Cascades to the open Methow Valley. Diablo Lake provides a natural pause before the higher pass country.

DISTANCE + DRIVING

126 miles | 4 hours. Allow additional time for stops and delays.

WHEN TO GO

Plan the full crossing for the snow-free season; SR20 closes seasonally across the passes. No 2027 opening date is confirmed here.

ACCESS + CONDITIONS

Check WSDOT pass status before departure. Snow, wildfire and repair work can interrupt the crossing.

SERVICES

Use gateway towns for fuel, food and lodging; do not plan on frequent services in the mountain section.

ALTERNATE

When the high crossing is closed, make a west-side out-and-back to the last legally open point; do not let navigation substitute a forest road.

SCENIC STOPS

A. Diablo Lake Overlook. See the 50 Scenic Stops guide for visit notes.

12 Ruby Beach turnoff US101
13 Kalaloch
14 Amanda Park
15 Humptulips
16 Aberdeen
17 Elma
18 McCleary
19 Olympia road access

THE DRIVE

Circle a peninsula of saltwater inlets, glacial lakes, rainforest gateways and wild Pacific beaches. Use a few overnight bases so that side trips into Olympic National Park do not become a series of long return drives.

DISTANCE + DRIVING

331 miles | 9.5 hours. Allow additional time for stops and delays.

WHEN TO GO

The coastal circuit is a year-round planning route, subject to storms and road work; mountain and forest side roads have separate seasonal conditions.

ACCESS + CONDITIONS

Check US101 bridge work and Olympic road alerts. Hurricane Ridge, Hoh and Quinault excursions are separate side trips, not through-roads across the park.

SERVICES

Port Angeles and Forks make useful larger resupply bases. Book coast lodging or campsites before depending on them.

ALTERNATE

If US101 is closed at Hoh River, split the trip into a northern and southern visit; the east-side road detour is substantial.

ROUTE 02 / PLANNING CARD

ROUTE 03 / PLANNING CARD

Columbia Gorge Waterfall Corridor

Use with the preceding route map.

THE DRIVE

Follow the drivable western section of the Historic Columbia River Highway from the ridge at Crown Point toward the waterfall corridor. This compact drive pairs broad river views with stops beneath forested basalt cliffs.

DISTANCE + DRIVING

15 miles | 0.5 hours. Allow additional time for stops and delays.

WHEN TO GO

Spring through fall is the usual sightseeing window; winter ice, high winds and storm damage can affect access.

ACCESS + CONDITIONS

Check current parking and entry arrangements for each waterfall site; no 2027 timed-entry rule is assumed.

SERVICES

Bring food and water; roadside parking is limited and cannot be treated as guaranteed.

ALTERNATE

If the historic road is closed, use I84 only as a signed transfer and visit open sites individually.

SCENIC STOPS

A. Vista House at Crown Point. See the 50 Scenic Stops guide for visit notes.

11 Florence
12 Reedsport
13 Coos Bay
14 Bandon
15 Port Orford
16 Gold Beach
17 Arch Rock US101 turnoff
18 Brookings

THE DRIVE

Travel south on US101 through working harbors, beach towns and a changing coast of dunes, headlands and offshore rocks. Give the journey several days so the drive leaves room for beaches and viewpoints.

DISTANCE + DRIVING

336 miles | 10 hours. Allow additional time for stops and delays.

WHEN TO GO

Possible in every season, with fog, wind and wet-weather disruption; daylight and beach conditions vary considerably.

ACCESS + CONDITIONS

Use designated parking and signed beach access. A viewpoint stop does not imply safe ocean access in every tide or swell.

SERVICES

Coastal towns offer regular resupply, but reserve popular overnights and check hours outside peak season.

ALTERNATE

In poor visibility, spend longer in the nearest town and shorten the day rather than chase every overlook.

ROUTE 04 / PLANNING CARD

Oregon Pacific Coast

ROUTE 05 / PLANNING CARD

Big Sur Coast

Use with the preceding route map.

THE DRIVE

Trace the meeting of coastal mountains and the Pacific between Carmel and San Simeon. The road itself provides much of the experience; choose a small number of legal stopping places and allow time for bends and traffic controls.

DISTANCE + DRIVING

88 miles | 2.5 hours. Allow additional time for stops and delays.

WHEN TO GO

A year-round planning corridor, with major storm and landslide interruptions possible. Through-access for a particular 2027 date is not assured.

ACCESS + CONDITIONS

Check Caltrans immediately before driving. Bixby Bridge is a drive-through landmark: current official guidance prohibits parking at either end.

SERVICES

Fuel and lodging are limited and often expensive; cell service is limited. Arrange overnight lodging before entering the remote section.

ALTERNATE

If SR1 is closed, visit the open northern or southern section as an out-and-back; a US101 detour is a separate inland transfer.

SCENIC STOPS

A. Pfeiffer Big Sur Redwood Day Use Area. See the 50 Scenic Stops guide for visit notes.

08 SR254 near Pepperwood

NPS / © OpenStreetMap contributors | https://www.openstreetmap.org/copyright | Natural Earth

ROUTE 06 / PLANNING CARD

Avenue of the Giants

Use with the preceding route map.

THE DRIVE

Leave the faster highway for a slower drive among Humboldt’s redwoods. Short grove visits and the park visitor center make this an easy route to enjoy without committing to a long walk.

DISTANCE + DRIVING

27 miles | 1.5 hours. Allow additional time for stops and delays.

WHEN TO GO

Year-round in principle; winter rain, flooding and tree damage can disrupt individual roads or groves.

ACCESS + CONDITIONS

Confirm park and SR254 conditions. Use marked day-use areas, and treat any walk as optional.

SERVICES

The visitor center is between Weott and Myers Flat. Resupply in nearby US101 towns before a longer forest day.

ALTERNATE

US101 is the parallel transfer corridor when signed local closures affect the avenue; it does not replace the grove experience.

SCENIC STOPS

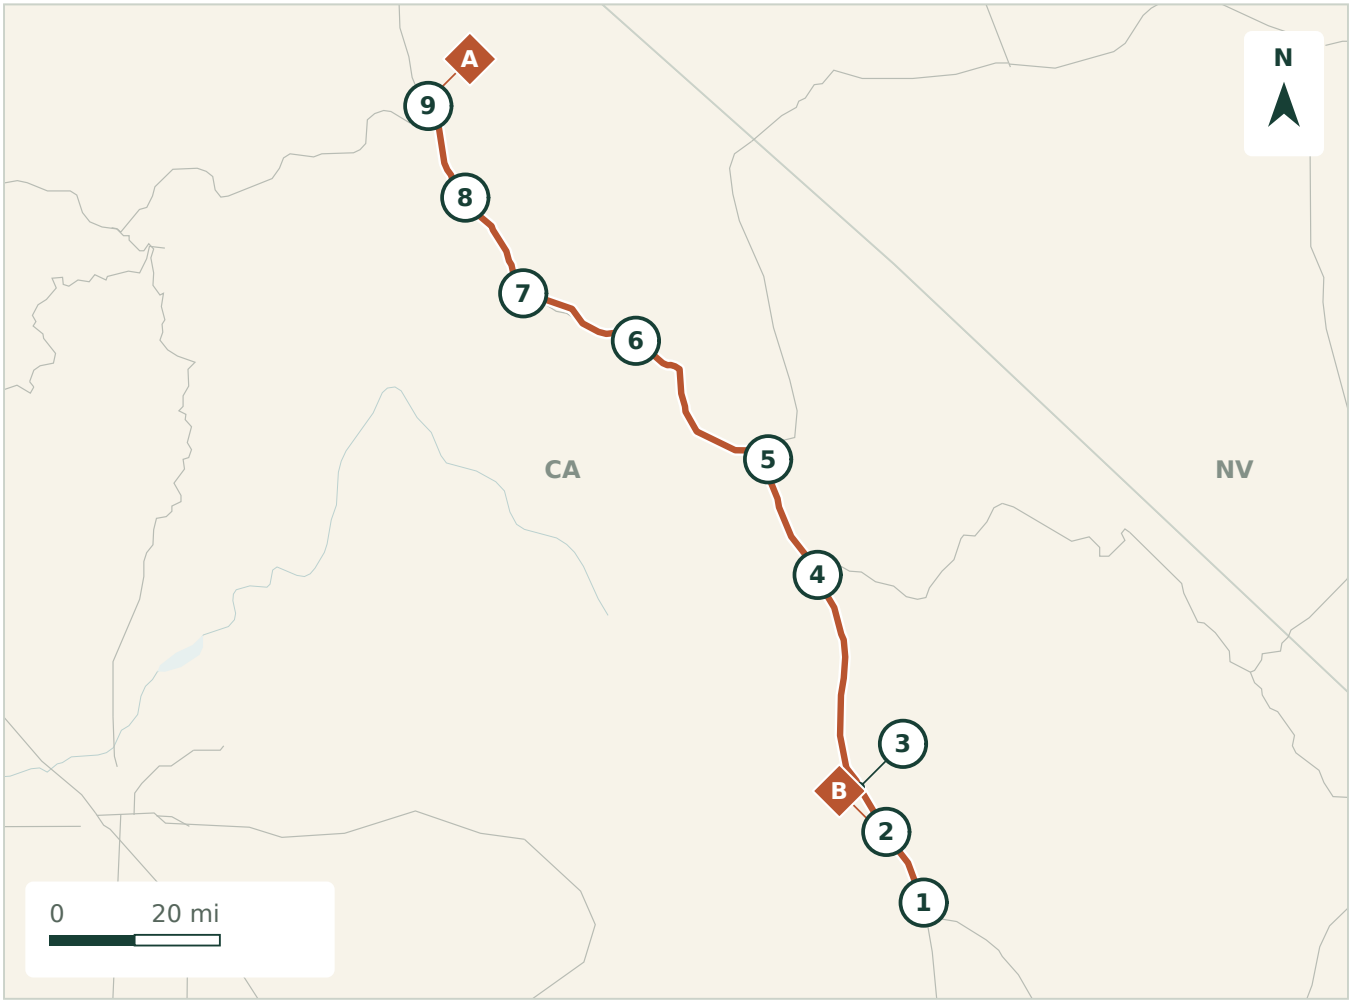

A. Humboldt Redwoods Visitor Center. See the 50 Scenic Stops guide for visit notes.

09 Lee Vining

NPS / © OpenStreetMap contributors | https://www.openstreetmap.org/copyright | Natural Earth

ROUTE 07 / PLANNING CARD

Eastern Sierra Highway 395

Use with the preceding route map.

THE DRIVE

Drive beside the Sierra Nevada from Lone Pine to Mono Basin, where desert valleys meet a high mountain skyline. Mix open-road scenery with a thoughtful stop at Manzanar and time around Bishop and Lee Vining.

DISTANCE + DRIVING

122 miles | 3 hours. Allow additional time for stops and delays.

WHEN TO GO

The main highway is a year-round corridor subject to winter conditions; high-elevation side roads have separate seasonal closures.

ACCESS + CONDITIONS

Check Caltrans, wind and chain controls. This mainline route does not include Tioga Pass, Whitney Portal, Bodie’s unpaved access or Movie Road.

SERVICES

Lone Pine, Bishop and Mammoth Lakes are practical overnight/resupply bases; Mammoth requires a paved SR203 side trip.

ALTERNATE

In winter or poor mountain weather, remain on the open main highway and choose town museums or lower-elevation stops.

SCENIC STOPS

A. Mono Basin Scenic Area Visitor Center; B. Manzanar National Historic Site. See the 50 Scenic Stops guide for visit notes.

07 Moose Pass
08 Seward

NPS / © OpenStreetMap contributors | https://www.openstreetmap.org/copyright | Natural Earth

ROUTE 08 / PLANNING CARD

Seward Highway

Use with the preceding route map.

THE DRIVE

Travel from Anchorage along Turnagain Arm, then through mountain valleys to Seward and Resurrection Bay. Leave time for formal viewpoints and a separate day in Seward rather than treating the entire journey as a quick airport transfer.

DISTANCE + DRIVING

124 miles | 3.5 hours. Allow additional time for stops and delays.

WHEN TO GO

A year-round highway, with winter storms and shorter daylight; late spring through early fall makes a more flexible sightseeing trip.

ACCESS + CONDITIONS

Check Alaska DOT road conditions and construction. Wildlife sightings and visibility are never guaranteed.

SERVICES

Fuel and resupply in Anchorage, Girdwood area or Seward; check opening hours for smaller businesses.

ALTERNATE

If weather deteriorates, shorten to open Turnagain Arm viewpoints and postpone the mountain crossing.

SCENIC STOPS

A. Beluga Point. See the 50 Scenic Stops guide for visit notes.

09 St. Mary

NPS / © OpenStreetMap contributors | https://www.openstreetmap.org/copyright | Natural Earth

ROUTE 09 / PLANNING CARD

Going-to-the-Sun Road

Use with the preceding route map.

THE DRIVE

Cross Glacier National Park from Lake McDonald’s forested shore to the alpine landscape at Logan Pass and the St. Mary valley. A full day allows viewpoint pauses and avoids turning a remarkable mountain drive into a race.

DISTANCE + DRIVING

50 miles | 2.5 hours. Allow additional time for stops and delays.

WHEN TO GO

The full road is a summer-season journey; opening and closure depend on snow. Check the published 2027 operating and entry program when available.

ACCESS + CONDITIONS

Current NPS limits prohibit vehicles/combinations longer than 21 ft or wider than 8 ft between Avalanche Creek and Rising Sun; tall vehicles also face overhang concerns. Recheck before travel.

SERVICES

Parking at Logan Pass can fill early. Verify seasonal shuttle operation, visitor-center hours and any reservation requirement.

ALTERNATE

Use the authorized park shuttle or a concession tour when appropriate, or visit open lower sections from one side.

SCENIC STOPS

A. Logan Pass Visitor Center. See the 50 Scenic Stops guide for visit notes.

07 Cooke City

NPS / © OpenStreetMap contributors | https://www.openstreetmap.org/copyright | Natural Earth

ROUTE 10 / PLANNING CARD

Beartooth Highway

Use with the preceding route map.

THE DRIVE

Climb from Red Lodge into open alpine country, with lakes and high views before descending toward Cooke City. The altitude and changing weather make a relaxed pace and a spare day especially useful.

DISTANCE + DRIVING

64 miles | 2.5 hours. Allow additional time for stops and delays.

WHEN TO GO

Seasonal high-country road, typically late May to mid-October, with weather closures possible at any time. These are historical planning bounds, not 2027 dates.

ACCESS + CONDITIONS

Check both Montana and Wyoming DOT status. Do not assume the pass is open because roads in a nearby town are clear.

SERVICES

Start with fuel, food and warm layers from Red Lodge or Cooke City; alpine services should not be assumed.

ALTERNATE

If closed, stay on the accessible side or plan a separately checked lower-road transfer; do not follow a suggested backcountry shortcut.

SCENIC STOPS

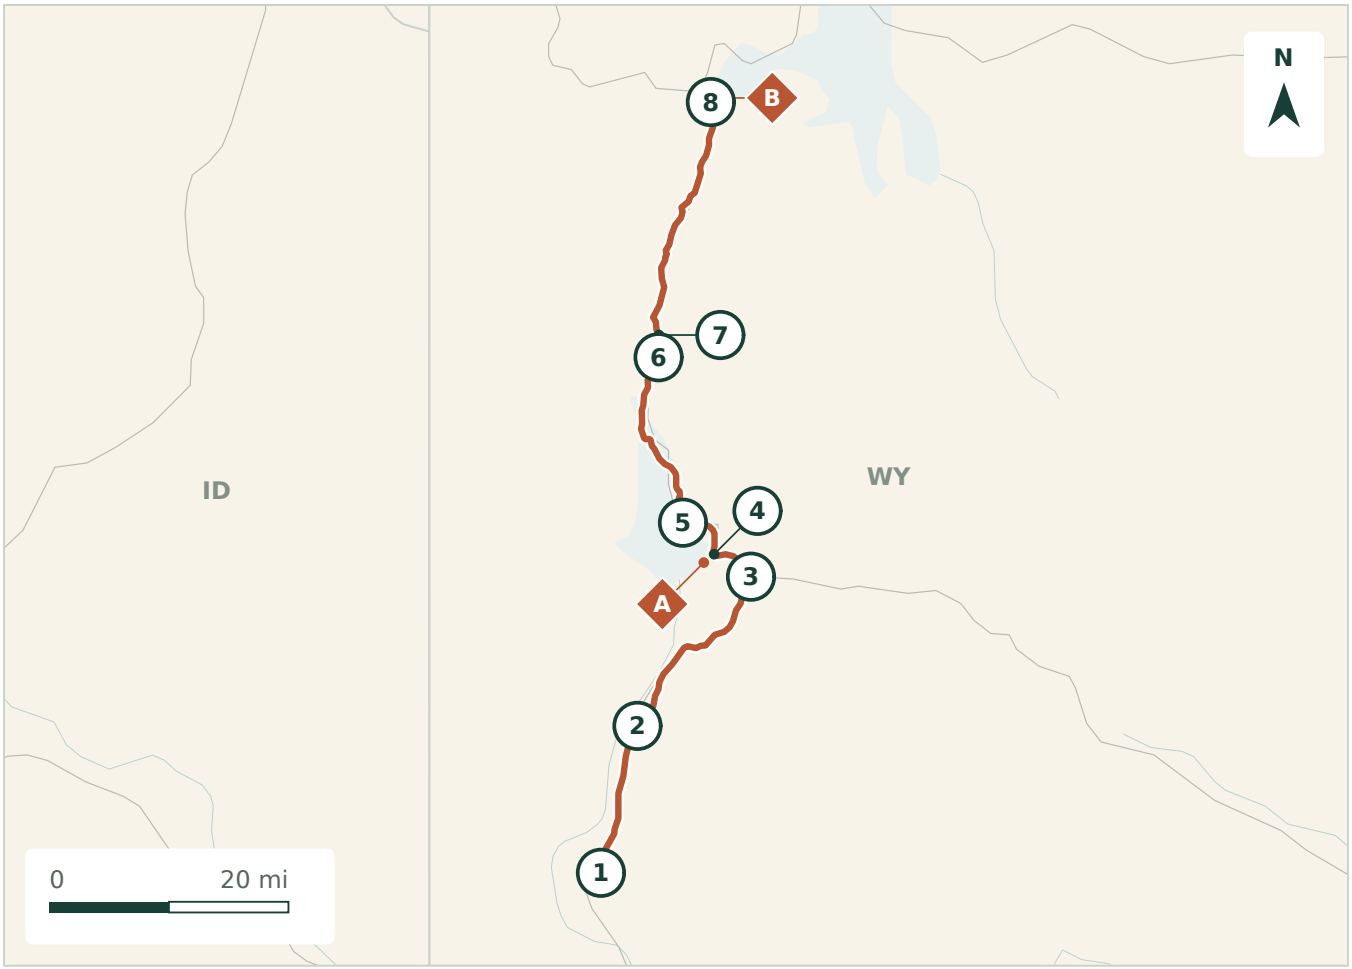

A. Rock Creek Vista Point. See the 50 Scenic Stops guide for visit notes.

08 West Thumb junction

NPS / © OpenStreetMap contributors | https://www.openstreetmap.org/copyright | Natural Earth

ROUTE 11 / PLANNING CARD

Grand Teton to Yellowstone’s West Thumb

Use with the preceding route map.

THE DRIVE

Follow the broad Jackson Hole valley north to Jackson Lake and the Rockefeller Parkway, then reach Yellowstone Lake at West Thumb. This is the linking road between two parks, with time reserved for scenery rather than a single nonstop transfer.

DISTANCE + DRIVING

78 miles | 2.5 hours. Allow additional time for stops and delays.

WHEN TO GO

The full ordinary-vehicle connection into Yellowstone is seasonal. Grand Teton’s main highways have different winter access from Yellowstone’s South Entrance.

ACCESS + CONDITIONS

Check both parks’ road status and separate fee/entry arrangements. Teton Park Road and Jenny Lake are optional side excursions with their own seasonality.

SERVICES

Reserve park-area lodging or campsites and confirm fuel locations and operating seasons before travel.

ALTERNATE

If Yellowstone’s South Entrance is closed, keep the visit within open Grand Teton roads; do not assume there is a nearby short detour.

SCENIC STOPS

A. Jackson Lake Dam Overlook; B. West Thumb Geyser Basin. See the 50 Scenic Stops guide for visit notes.

09 Boulder
10 Torrey / UT24 junction

NPS / © OpenStreetMap contributors | https://www.openstreetmap.org/copyright | Natural Earth

ROUTE 12 / PLANNING CARD

Utah Scenic Byway 12

Use with the preceding route map.

THE DRIVE

Move from Red Canyon and Bryce country through Escalante’s sandstone landscape to Boulder Mountain and Torrey. The changes in scenery reward a journey spread over several days, with scenic viewpoints and small-town stops between park visits.

DISTANCE + DRIVING

130 miles | 4 hours. Allow additional time for stops and delays.

WHEN TO GO

Spring through fall is the usual road-trip window; Boulder Mountain can have snow and winter conditions. No 2027 season is guaranteed.

ACCESS + CONDITIONS

Steep grades and exposed curves on the Hogback merit unrushed driving. Unpaved backways are not included.

SERVICES

Plan fuel and meals around towns rather than assuming services on the canyon or mountain sections.

ALTERNATE

If high-country weather affects UT12, stay in an accessible town and use a separately checked main-road transfer.

SCENIC STOPS

A. Sunset Point at Bryce Canyon; B. Anasazi State Park Museum. See the 50 Scenic Stops guide for visit notes.

ROUTE 13 / PLANNING CARD

Capitol Reef Highway 24

Use with the preceding route map.

THE DRIVE

Follow the Fremont River through Capitol Reef’s cliffs and historic Fruita, then continue into the more open desert toward Hanksville. Roadside viewpoints and the petroglyph boardwalk make a rewarding introduction without a backcountry road.

DISTANCE + DRIVING

48 miles | 1.5 hours. Allow additional time for stops and delays.

WHEN TO GO

A year-round main highway subject to storms, flooding, heat and winter conditions.

ACCESS + CONDITIONS

Check park alerts. The separate Scenic Drive is an out-and-back; Cathedral Valley, Notom-Bullfrog and Burr Trail dirt sections are excluded.

SERVICES

Torrey and Hanksville are the main planning bases; carry water and allow for limited intermediate services.

ALTERNATE

If a park spur closes, keep to open UT24 and signed roadside viewpoints; never substitute a dirt backway.

SCENIC STOPS

A. Capitol Reef Petroglyph Panels. See the 50 Scenic Stops guide for visit notes.

NPS / © OpenStreetMap contributors | https://www.openstreetmap.org/copyright | Natural Earth

ROUTE 14 / PLANNING CARD

Oak Creek Canyon

Use with the preceding route map.

THE DRIVE

Descend from Flagstaff’s forest toward the red-rock country of Sedona on SR89A. The canyon’s curves, changing vegetation and streamside landscape make this a rewarding slow approach to town.

DISTANCE + DRIVING

24 miles | 1 hours. Allow additional time for stops and delays.

WHEN TO GO

Possible year-round, with snow or ice near the rim and crowded weekends in warmer months.

ACCESS + CONDITIONS

Check current Arizona road alerts, especially after storms. Individual recreation-site parking and fees are separate from the road.

SERVICES

Use Flagstaff or Sedona for major resupply and overnight arrangements.

ALTERNATE

If the canyon road is closed, use an officially signed main-road detour; do not follow forest-road shortcuts.

SCENIC STOPS

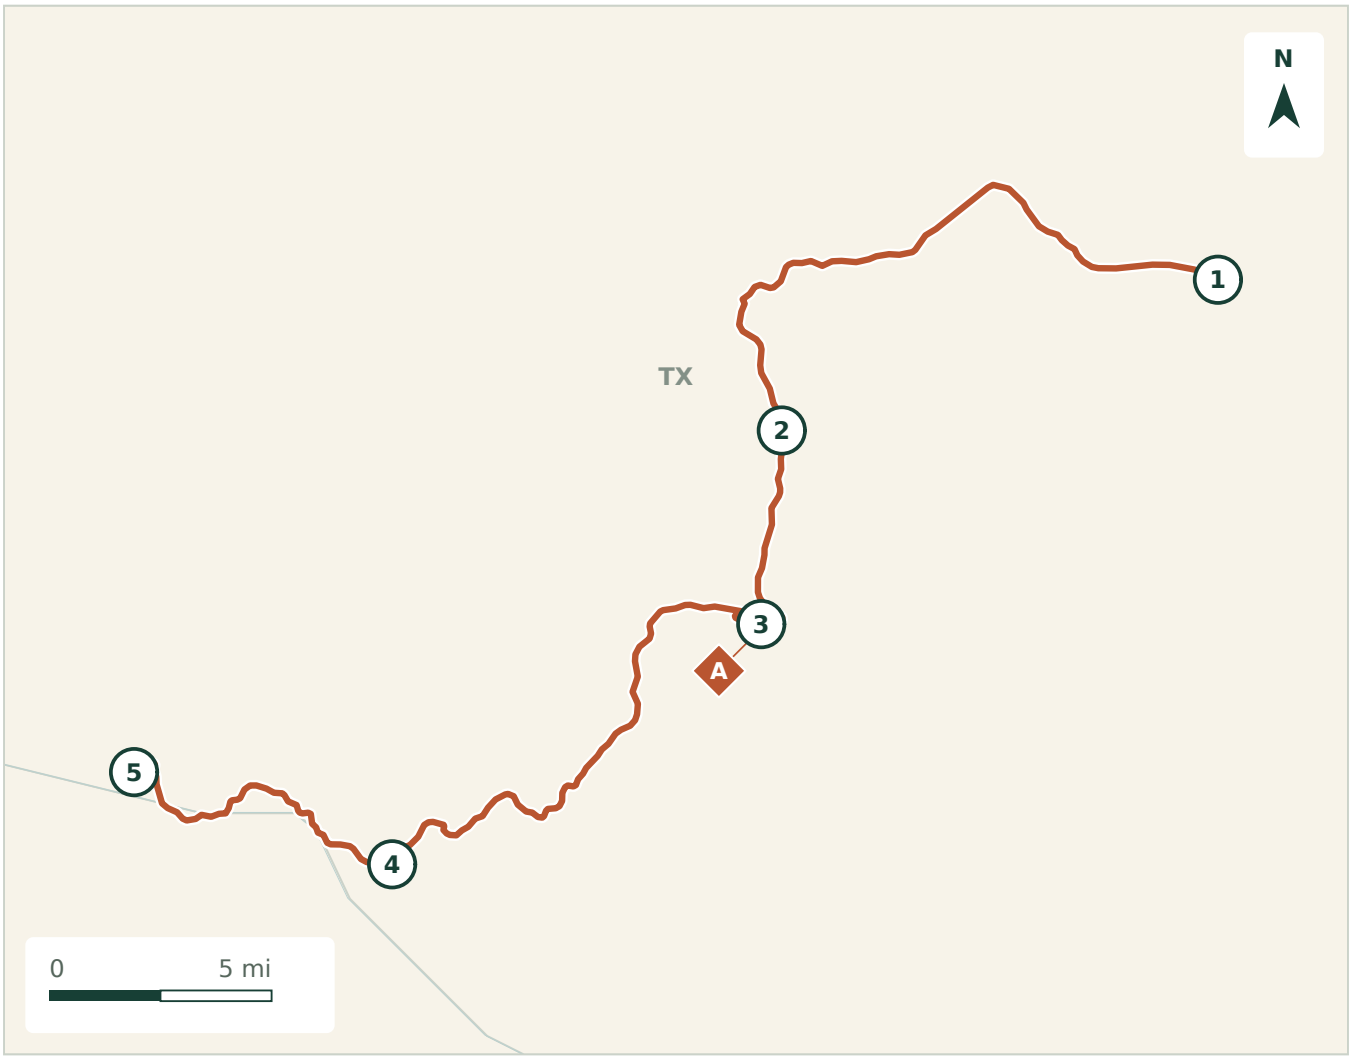

A. Oak Creek Vista. See the 50 Scenic Stops guide for visit notes.

04 Castolon

05 Santa Elena Canyon paved road end

NPS / © OpenStreetMap contributors | https://www.openstreetmap.org/copyright | Natural Earth

ROUTE 15 / PLANNING CARD

Ross Maxwell Scenic Drive

Use with the preceding route map.

THE DRIVE

Explore Big Bend’s western desert from elevated overlooks down to the Rio Grande near Santa Elena Canyon. Broad views and historic ranch sites provide natural stopping points along this paved park drive.

DISTANCE + DRIVING

43 miles | 2 hours. Allow additional time for stops and delays.

WHEN TO GO

Cooler months generally suit desert sightseeing; extreme heat and flash flooding can affect visits and access.

ACCESS + CONDITIONS

Check Big Bend road alerts and weather. This is an out-and-back paved route; Old Maverick Road is not included as a return shortcut. The mapped mileage is one way; allow the same distance again for the return drive.

SERVICES

Carry drinking water and food and fuel before the drive; do not rely on every facility being open.

ALTERNATE

If the lower road is closed, visit only the legally open northern overlooks and return the same way.

SCENIC STOPS

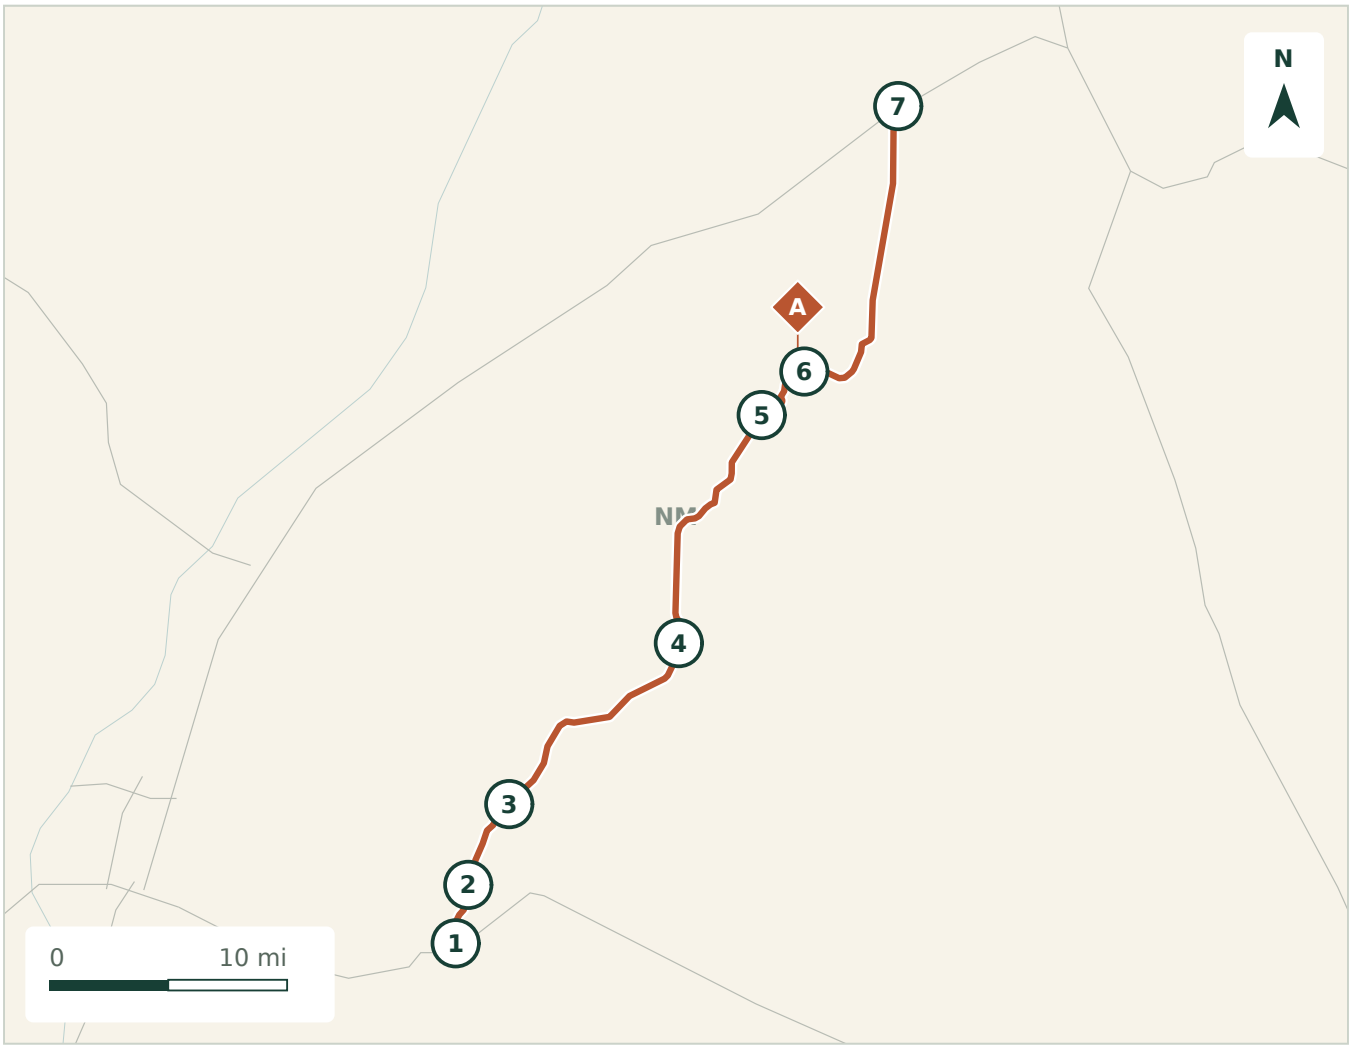

A. Sotol Vista. See the 50 Scenic Stops guide for visit notes.

04 Golden
05 Madrid
06 Cerrillos spur junction NM14
07 NM14 / I25 south of Santa Fe

NPS / © OpenStreetMap contributors | https://www.openstreetmap.org/copyright | Natural Earth

ROUTE 16 / PLANNING CARD

Turquoise Trail

Use with the preceding route map.

THE DRIVE

Take NM14 between the Albuquerque foothills and Santa Fe’s outskirts through open hills and the communities of Madrid and Cerrillos. Build time into the day for local history and browsing rather than simply replacing an interstate drive.

DISTANCE + DRIVING

45 miles | 1.5 hours. Allow additional time for stops and delays.

WHEN TO GO

Possible in all seasons, with winter weather and variable business opening hours.

ACCESS + CONDITIONS

Check NM14 conditions. The mountain climb on NM536 to Sandia Crest is not part of this mainline map.

SERVICES

Arrange meals around actual opening hours. Albuquerque and Santa Fe provide the broadest choices of lodging and services.

ALTERNATE

For a time-limited transfer use I25 separately; return to the byway when there is time to stop.

13 US160 Business through Mancos
14 Durango

NPS / © OpenStreetMap contributors | https://www.openstreetmap.org/copyright | Natural Earth

ROUTE 17 / PLANNING CARD

San Juan Skyway

Use with the preceding route map.

THE DRIVE

Link Durango, Silverton, Ouray and Telluride with a circuit through Colorado’s San Juan Mountains. Historic towns break up the mountain driving, while the western section changes from high forest toward the lower country near Dolores and Cortez.

DISTANCE + DRIVING

231 miles | 6-7 hours. Allow additional time for stops and delays.

WHEN TO GO

Summer through early fall is the simplest sightseeing window; snow, traction requirements and pass closures are possible outside it.

ACCESS + CONDITIONS

Mountain grades and exposed bends require an appropriate vehicle and driver. No blanket RV suitability or clearance claim is made.

SERVICES

Plan overnights in the established towns. Mountain-pass segments have limited places to stop or resupply.

ALTERNATE

In difficult weather, visit accessible towns from lower highways and defer the high-pass circuit.

SCENIC STOPS

A. Molas Pass Overlook. See the 50 Scenic Stops guide for visit notes.

ROUTE 18 / PLANNING CARD

Trail Ridge Road

Use with the preceding route map.

THE DRIVE

Cross Rocky Mountain National Park between Estes Park and Grand Lake, climbing above the trees into alpine scenery. A day with flexible stopping time is more useful than planning the crossing around a single predicted drive time.

DISTANCE + DRIVING

47 miles | 2 hours. Allow additional time for stops and delays.

WHEN TO GO

Usually a late-spring to autumn crossing; winter closure is normal and weather can close it during the operating season. 2027 dates remain unconfirmed.

ACCESS + CONDITIONS

Check NPS road status and the 2027 entry/permit program. High elevation and fast weather changes matter even on a short stop.

SERVICES

Start from Estes Park or Grand Lake with supplies. Seasonal visitor-center access and food services need a separate check.

ALTERNATE

When the crossing closes, visit the accessible lower side of the park. A trip around the mountains is a separate long transfer.

SCENIC STOPS

A. Alpine Visitor Center. See the 50 Scenic Stops guide for visit notes.

ROUTE 19 / PLANNING CARD

Sawtooth Scenic Byway

Use with the preceding route map.

THE DRIVE

Follow Idaho 75 from the plains around Shoshone through the Wood River Valley to the Sawtooth country near Stanley. The Galena-area climb opens into broad mountain and valley views before the road reaches the Salmon River headwaters.

DISTANCE + DRIVING

116 miles | 3.5 hours. Allow additional time for stops and delays.

WHEN TO GO

A year-round highway, with mountain winter conditions; summer and early autumn provide more flexible stopping and lake access.

ACCESS + CONDITIONS

Check Idaho road status and wildfire conditions. Side roads and recreation facilities have separate seasons.

SERVICES

Use Wood River Valley towns and Stanley as service bases and verify seasonal opening hours.

ALTERNATE

If conditions prevent the summit crossing, explore the open Wood River Valley section and reschedule Stanley.

SCENIC STOPS

A. Bethine and Frank Church Overlook. See the 50 Scenic Stops guide for visit notes.

Badlands Loop Road

Use with the preceding route map.

THE DRIVE

Wind through the North Unit of Badlands National Park on a paved road with frequent views across eroded ridges and prairie. Choose a few overlooks and leave time to watch the changing light.

DISTANCE + DRIVING

38 miles | 1.5 hours. Allow additional time for stops and delays.

WHEN TO GO

Possible in all seasons, with summer heat, thunderstorms, wind and winter snow affecting comfort and access.

ACCESS + CONDITIONS

Check park conditions. Stay in designated pullouts and keep wildlife viewing separate from stopping in traffic.

SERVICES

Fuel and food are available in gateway towns; bring water for stops in the exposed park landscape.

ALTERNATE

If conditions shorten the visit, focus on open overlooks near one entrance rather than trying to complete every stop.

SCENIC STOPS

A. Big Badlands Overlook. See the 50 Scenic Stops guide for visit notes.

09 Blue Ridge Parkway milepost 420
10 Blue Ridge Parkway milepost 469

NPS / © OpenStreetMap contributors | https://www.openstreetmap.org/copyright | Natural Earth

ROUTE 21 / PLANNING CARD

Blue Ridge Parkway

Use with the preceding route map.

THE DRIVE

Follow the Blue Ridge through a long procession of ridges, wooded gaps and small mountain communities. Frequent overlooks make this a journey to divide into short driving days, with time for Appalachian history, a picnic and a walk when the weather is clear.

DISTANCE + DRIVING

469 miles | 16 hours. Allow additional time for stops and delays.

WHEN TO GO

Late spring through autumn is the easiest planning window for seasonal facilities. Fog, ice and snow can interrupt mountain travel in any shoulder season.

ACCESS + CONDITIONS

Check the NPS closure list before every driving day; repair and weather closures can break the through route. Confirm tunnel clearance for the exact vehicle. Do not assume a continuous 2027 opening.

SERVICES

No fuel is sold on the Parkway itself. Plan fuel, meals and lodging in gateway towns; visitor facilities and lodging are seasonal.

ALTERNATE

Use the signed NPS detour or a verified gateway highway around a closed section; a stay day in the nearest booked town is preferable to improvising a mountain shortcut.

SCENIC STOPS

A. Mabry Mill; B. Waterrock Knob Viewpoint. See the 50 Scenic Stops guide for visit notes.

07 Rockfish Gap

NPS / © OpenStreetMap contributors | https://www.openstreetmap.org/copyright | Natural Earth

ROUTE 22 / PLANNING CARD

Skyline Drive

Use with the preceding route map.

THE DRIVE

Travel along Shenandoah’s ridge crest, looking east toward the Piedmont and west across the Shenandoah Valley. The road suits a patient pace: stop at an overlook, spend time around Big Meadows and leave room for wildlife delays.

DISTANCE + DRIVING

105 miles | 3 hours. Allow additional time for stops and delays.

WHEN TO GO

Spring through autumn offers the broadest choice of open services. Winter access depends on road conditions.

ACCESS + CONDITIONS

Use only the four public vehicle entrances: Front Royal, Thornton Gap, Swift Run Gap and Rockfish Gap. Inclement weather can close sections. Check Marys Rock Tunnel clearance for tall vehicles. An entrance fee/pass is required.

SERVICES

Fuel and food options within the park are limited; check seasonal operating dates. As checked, NPS had not released early-2027 campground reservations.

ALTERNATE

When a section is closed, stay outside the park and use the public entrance serving the open section; never follow a GPS suggestion onto a gated boundary road.

SCENIC STOPS

A. Big Meadows. See the 50 Scenic Stops guide for visit notes.

09 Leipers Fork area
10 TN 100 northern terminus

NPS / © OpenStreetMap contributors | https://www.openstreetmap.org/copyright | Natural Earth

ROUTE 23 / PLANNING CARD

Natchez Trace Parkway

Use with the preceding route map.

THE DRIVE

Link Natchez with the wooded outskirts of Nashville on a quiet recreational road. Cypress wetlands, preserved stretches of the old travel route and interpretive stops reward a slower journey through three states.

DISTANCE + DRIVING

444 miles | 10 hours. Allow additional time for stops and delays.

WHEN TO GO

Spring and autumn are comfortable choices for roadside walks. Summer can be hot and humid; check storm and winter-weather alerts in any season.

ACCESS + CONDITIONS

The recreational road has many access points but not every crossing is an interchange. Check NPS road/site conditions; the mapped historic corridor is not a guarantee of uninterrupted access.

SERVICES

Plan food, fuel and overnight stays in communities off the Parkway. Carry water before stopping for a walk.

ALTERNATE

Use the official signed road detour and rejoin at a documented access point. The old walking Trace is not a vehicle alternative.

SCENIC STOPS

A. Cypress Swamp; B. Meriwether Lewis Site. See the 50 Scenic Stops guide for visit notes.

NPS / © OpenStreetMap contributors | https://www.openstreetmap.org/copyright | Natural Earth

ROUTE 24 / PLANNING CARD

Acadia Park Loop Road

Use with the preceding route map.

THE DRIVE

Make a compact coastal circuit through Acadia, from wooded hills to Atlantic shore and the clear water of Jordan Pond. This is a full sightseeing day when beaches, viewpoints and a gentle shoreline walk are part of the plan.

DISTANCE + DRIVING

25 miles | 1-2 hours. Allow additional time for stops and delays.

WHEN TO GO

Plan the full loop within its published spring-to-late-autumn vehicle season; most of the road closes in winter. Verify the actual 2027 dates.

ACCESS + CONDITIONS

Follow the one-way direction toward Sand Beach. An entrance pass is required. Cadillac Summit Road is a separate side trip with its own reservation rules; it is not included in this loop.

SERVICES

Parking can fill early. Check the seasonal Island Explorer service and current visitor-facility hours.

ALTERNATE

Use an operating Island Explorer route or choose a quiet shore walk from a legal parking area; do not circle one-way roads against traffic looking for a space.

SCENIC STOPS

A. Jordan Pond. See the 50 Scenic Stops guide for visit notes.

ROUTE 25 / PLANNING CARD

Kancamagus Highway

Use with the preceding route map.

THE DRIVE

Cross the White Mountains on NH 112 between Lincoln and Conway. Forested slopes, river scenery and mountain overlooks make a short road feel like a complete day when you pause at Rocky Gorge and leave time for a picnic.

DISTANCE + DRIVING

34 miles | 1.5 hours. Allow additional time for stops and delays.

WHEN TO GO

Late spring through autumn offers a straightforward sightseeing window. Foliage weekends are busy; winter mountain weather needs a separate road check.

ACCESS + CONDITIONS

Some recreation parking areas require a pass. Scenic-road access does not mean every trailhead or restroom is open. Check current USFS notices and NH road conditions.

SERVICES

No fuel or other commercial services are available along the central scenic crossing. Stock up in Lincoln or Conway.

ALTERNATE

If the mountain crossing is affected by weather, spend the day in your gateway town and choose another departure time; do not treat seasonal Bear Notch Road as a guaranteed detour.

SCENIC STOPS

A. Rocky Gorge. See the 50 Scenic Stops guide for visit notes.

ROUTE 26 / PLANNING CARD

Vermont Route 100: Wilmington to Stowe

Use with the preceding route map.

THE DRIVE

Follow a string of Vermont villages along the Green Mountains, with country stores, river valleys and an easy-to-reach waterfall at Granville Gulf. Break the journey into village-sized days instead of racing from one end to the other.

DISTANCE + DRIVING

143 miles | 5 hours. Allow additional time for stops and delays.

WHEN TO GO

Late spring through autumn supports the widest range of casual touring. Autumn reservations deserve early attention; winter is a different driving and activity season.

ACCESS + CONDITIONS

This is a selected VT 100 journey, not a claim that its endpoints equal the entire official designated byway. Stay on VT 100; optional mountain-gap roads may have steep grades or seasonal closures.

SERVICES

Use the main villages for food, fuel and lodging. Do not assume small independent businesses are open every weekday.

ALTERNATE

Use a village stay or a shorter valley section in poor weather; skip unverified gap-road shortcuts.

SCENIC STOPS

A. Moss Glen Falls, Granville. See the 50 Scenic Stops guide for visit notes.

ROUTE 27 / PLANNING CARD

Mohawk Trail: Williamstown to Greenfield

Use with the preceding route map.

THE DRIVE

Cross northern Massachusetts from the Berkshires into the Deerfield River valley on Route 2. Forested ridges, a famous hairpin bend and former mill towns give the route a satisfying mix of scenery and small-town stops.

DISTANCE + DRIVING

41 miles | 1.5 hours. Allow additional time for stops and delays.

WHEN TO GO

Spring through autumn suits a combined drive and woodland visit. Autumn color is variable; winter brings mountain-road considerations.

ACCESS + CONDITIONS

Use signed pullouts around the hairpin bend. Footpaths and seasonal town attractions may have different opening dates from Route 2 itself.

SERVICES

North Adams, Shelburne Falls and Greenfield make practical meal and lodging bases; smaller stops keep individual hours.

ALTERNATE

Use a town or museum day if cloud and rain remove the ridge views; retain Route 2 as the main corridor.

SCENIC STOPS

A. Mohawk Trail State Forest. See the 50 Scenic Stops guide for visit notes.

ROUTE 28 / PLANNING CARD

Catskill Mountains: Olive to Andes

Use with the preceding route map.

THE DRIVE

Follow NY 28 through reservoir country, mountain hamlets and the central Catskills. A stop on the Ashokan Rail Trail adds a level walking option before the road continues toward Margaretville and Andes.

DISTANCE + DRIVING

42 miles | 1.5 hours. Allow additional time for stops and delays.

WHEN TO GO

Late spring through autumn is a comfortable touring choice. Winter weather can change road and walking conditions quickly.

ACCESS + CONDITIONS

This map follows the NY 28 spine of the named byway. Recreation trail rules apply separately; the Ashokan Rail Trail is non-motorized.

SERVICES

Plan overnight stops in established villages, and check restaurants before relying on a late arrival.

ALTERNATE

Shorten the journey to one valley and use indoor village stops when weather makes trails unappealing.

SCENIC STOPS

A. Ashokan Rail Trail - Boiceville Bridge. See the 50 Scenic Stops guide for visit notes.

ROUTE 29 / PLANNING CARD

Upper Delaware Scenic Byway

Use with the preceding route map.

THE DRIVE

Trace the New York bank of the Delaware River on NY 97. The drive alternates between wooded bends, river towns and the cliffside views at Hawk’s Nest, with easy opportunities to stop without committing to a long hike.

DISTANCE + DRIVING

69 miles | 2 hours. Allow additional time for stops and delays.

WHEN TO GO

Spring through autumn offers a pleasant drive; winter birdwatching is possible only when road and parking conditions permit.

ACCESS + CONDITIONS

Hawk’s Nest has small, narrow pullouts on the river side of the road; NPS notes that southbound access is easier. Never stop in the travel lane or shoulder.

SERVICES

Use river towns for planned meals and fuel. Kayaking and rafting require separate outfitter arrangements and river-condition checks.

ALTERNATE

Choose a larger town riverfront if a narrow overlook is full; skip the pullout rather than waiting on the roadway.

SCENIC STOPS

A. Hawk’s Nest. See the 50 Scenic Stops guide for visit notes.

ROUTE 30 / PLANNING CARD

Hocking Hills Scenic Byway

Use with the preceding route map.

THE DRIVE

Drive through southeast Ohio’s wooded sandstone country, using SR 374 as the link between separate park areas. Ash Cave makes a useful first choice for a short outing; adding every gorge and cave would turn the day into a rush.

DISTANCE + DRIVING

26 miles | 1 hours. Allow additional time for stops and delays.

WHEN TO GO

Spring through autumn offers the simplest introduction. Winter ice can change the difficulty of even a short park trail.

ACCESS + CONDITIONS

Follow the signed byway and park-area directions; the attractions are separate sites with separate parking. Obey trail closures and one-way hiking rules where posted.

SERVICES

Bring water and a picnic; use Logan or a prebooked local base for supplies and lodging.

ALTERNATE

Choose the short Ash Cave gorge path only if its current conditions suit you, or keep the outing to a drive with a visitor-center stop.

SCENIC STOPS

A. Ash Cave. See the 50 Scenic Stops guide for visit notes.

ROUTE 31 / PLANNING CARD

Ohio River Towns: Aurora to Madison

Use with the preceding route map.

THE DRIVE

Follow the Ohio River through southeastern Indiana’s small towns and farmland. The river bends through Rising Sun and Vevay before the journey reaches Madison, where a separate visit to Clifty Falls adds woodland and canyon scenery.

DISTANCE + DRIVING

58 miles | 2 hours. Allow additional time for stops and delays.

WHEN TO GO

Spring through autumn suits riverfront stops. High water and local flood closures require a check in any season.

ACCESS + CONDITIONS

This is the southeastern section of Indiana’s much longer Ohio River Scenic Byway. Clifty Falls is a separate park detour; confirm entrance and trail conditions.

SERVICES

Aurora, Rising Sun, Vevay and Madison are useful service anchors; do not rely on every riverside stop being open late.

ALTERNATE

If river roads are affected by flooding, use the official highway detour and keep Madison as a fixed base.

SCENIC STOPS

A. Clifty Falls State Park. See the 50 Scenic Stops guide for visit notes.

ROUTE 32 / PLANNING CARD

Meeting of the Great Rivers: Hartford to Pere Marquette

Use with the preceding route map.

THE DRIVE

Travel beside the Mississippi and Illinois rivers beneath limestone bluffs, linking Hartford, Alton, Elsah and Grafton. Pere Marquette State Park provides the wooded finale, while a three-day stay lets the river towns have as much attention as the road.

DISTANCE + DRIVING

30 miles | 1 hours. Allow additional time for stops and delays.

WHEN TO GO

Spring through autumn works well for a first visit; winter birdwatching is an optional separate focus. Check river levels and park road conditions.

ACCESS + CONDITIONS

This map deliberately covers the Hartford-Pere Marquette core. No river ferry or extension to Kampsville is needed. Check flood-related road and trail notices.

SERVICES

Alton and Grafton offer practical meal and overnight bases. Confirm operating days for specific attractions.

ALTERNATE

Keep a town day in reserve for flood or weather disruption; do not add an unverified ferry crossing.

SCENIC STOPS

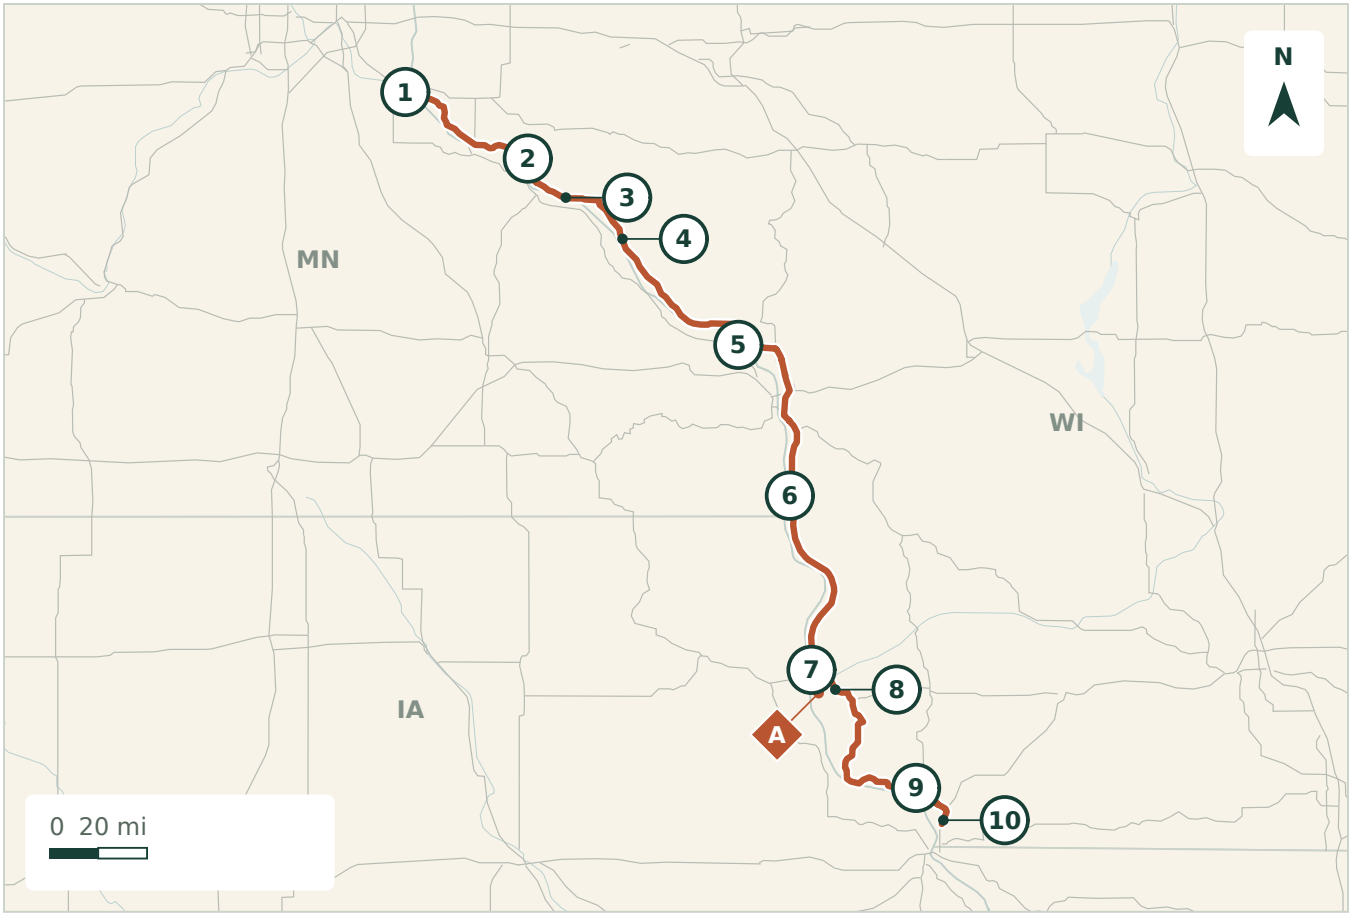

A. Pere Marquette State Park. See the 50 Scenic Stops guide for visit notes.

ROUTE 33 / PLANNING CARD

Wisconsin Great River Road

Use with the preceding route map.

THE DRIVE

Follow the Mississippi along Wisconsin’s western edge, passing bluff country and a chain of river towns. The road invites a series of short stages, with a separate Wyalusing State Park detour for views over the river confluence.

DISTANCE + DRIVING

242 miles | 7.5 hours. Allow additional time for stops and delays.

WHEN TO GO

Late spring through autumn suits extended town and park visits. Winter can be rewarding for river birds when roads and overlooks are safe.

ACCESS + CONDITIONS

Follow the signed Great River Road through southern junctions rather than assuming the entire trip is one unchanged route number. Check flood, construction and winter conditions.

SERVICES

Plan fuel and meals in the river towns, with La Crosse and Prairie du Chien as larger service hubs.

ALTERNATE

Split the journey into northern and southern sections when time or conditions are tight.

ROUTE 34 / PLANNING CARD

Lake Superior North Shore

Use with the preceding route map.

THE DRIVE

Follow Lake Superior from Duluth toward Grand Portage, using the old shoreline road to Two Harbors before continuing on Highway 61. Waterfalls, rock shores and small harbor towns make this a strong choice for three days with two overnight bases.

DISTANCE + DRIVING

142 miles | 4 hours. Allow additional time for stops and delays.

WHEN TO GO

Late spring through autumn is an easy first-trip window. Lake weather changes quickly and shoulder-season services are reduced.

ACCESS + CONDITIONS

This US-only version ends at Grand Portage, before the international crossing. State-park access, historic-site hours and any seasonal overlook roads need separate checks.

SERVICES

Duluth, Two Harbors and Grand Marais are useful supply and overnight anchors. Book high-season lodging ahead.

ALTERNATE

In poor weather, keep MN 61 as the travel corridor and replace exposed shore stops with a visitor-center or town stop.

SCENIC STOPS

A. Gooseberry Falls State Park; B. Split Rock Lighthouse. See the 50 Scenic Stops guide for visit notes.

ROUTE 35 / PLANNING CARD

Michigan M-22: Lake Michigan and Leelanau

Use with the preceding route map.

THE DRIVE

Round the Lake Michigan coast and Leelanau Peninsula on M-22, linking beaches, dune country and harbor towns. Add the short M-109 side trip for the Sleeping Bear Dune Climb, then return to the main scenic route.

DISTANCE + DRIVING

116 miles | 3.5 hours. Allow additional time for stops and delays.

WHEN TO GO

Late spring through autumn suits beaches, village stops and longer daylight. Winter driving and dune conditions require a separate plan.

ACCESS + CONDITIONS

M-22 stays the main corridor. A park pass is required for applicable national-lakeshore stops. The Dune Climb is strenuous and is not a quick route to Lake Michigan.

SERVICES

Use Frankfort, Empire/Glen Arbor, Leland, Northport and Suttons Bay for planned services; operating days vary.

ALTERNATE

Choose the picnic area at the foot of the Dune Climb or a village waterfront when strenuous walking is not suitable.

SCENIC STOPS

A. Sleeping Bear Dune Climb. See the 50 Scenic Stops guide for visit notes.

ROUTE 36 / PLANNING CARD

River Road: Au Sable Valley

Use with the preceding route map.

THE DRIVE

Head inland from Oscoda beside the Au Sable River through the Huron National Forest. Bluff views and logging-history stops give this short route plenty of substance, especially with time at Lumberman’s Monument.

DISTANCE + DRIVING

18 miles | 1 hours. Allow additional time for stops and delays.

WHEN TO GO

Spring through autumn is the simplest touring window; winter is possible only with appropriate road and recreation checks.

ACCESS + CONDITIONS

Overlook and trail access vary independently of the main road. Some viewpoints have stairs; do not assume every stop accommodates a large vehicle.

SERVICES

Stock up in Oscoda before heading inland. The visitor center has seasonal hours.

ALTERNATE

Use the upper observation areas and skip steep stair descents when mobility or weather makes them unsuitable.

SCENIC STOPS

A. Lumberman’s Monument. See the 50 Scenic Stops guide for visit notes.

ROUTE 37 / PLANNING CARD

Door County Coastal Byway

Use with the preceding route map.

THE DRIVE

Loop around the northern Door Peninsula, taking the Green Bay side north on Highway 42 and the Lake Michigan side south on Highway 57. Harbor villages, woodland and a Cave Point detour provide contrasting views without requiring an island ferry.

DISTANCE + DRIVING

80 miles | 3 hours. Allow additional time for stops and delays.

WHEN TO GO

Late spring through autumn supports the widest service choice. Winter shoreline ice changes walking conditions.

ACCESS + CONDITIONS

The Northport tip is an out-and-back spur from the loop; no Washington Island ferry is included. Cliff and shoreline stops need caution in waves or ice.

SERVICES

Sturgeon Bay, Fish Creek, Sister Bay and Baileys Harbor are useful bases. Check seasonal restaurant hours.

ALTERNATE

Skip the exposed Cave Point shore in high waves and use a village or sheltered park stop instead.

SCENIC STOPS

A. Cave Point County Park. See the 50 Scenic Stops guide for visit notes.

ROUTE 38 / PLANNING CARD

Outer Banks: Whalebone Junction to Cedar Island

Use with the preceding route map.

THE DRIVE

Follow NC 12 down the barrier islands, combining open shoreline, sound-side communities and lighthouse grounds. Two vehicle ferries make this a road-and-water journey, with Ocracoke deserving time of its own.

DISTANCE + DRIVING

106 miles | 2.5 hours + ferry travel. Allow additional time for stops and delays.

WHEN TO GO

Late spring and early autumn can be pleasant, but storms, overwash and ferry disruption are possible. Build flexibility into any season.

ACCESS + CONDITIONS

Check NC 12 status and both vehicle-ferry schedules before booking each stage. Cedar Island service needs advance reservation planning. Do not substitute the passenger-only Ocracoke Express for a vehicle crossing. 2027 sailing schedules are not confirmed here.

SERVICES

Plan fuel and food before ferry legs; reserve lodging on each island rather than depending on same-day availability.

ALTERNATE

Stay on the current island if weather cancels travel. Mainland diversions require a revised itinerary; never route across closed NC 12.

FERRY CROSSINGS

Hatteras-Ocracoke Ferry; Ocracoke-Cedar Island vehicle ferry. Confirm the operator's current timetable, fares and vehicle limits before departure. Allow for boarding and waiting time.

SCENIC STOPS

A. Cape Hatteras Light Station; B. Ocracoke Light Station. See the 50 Scenic Stops guide for visit notes.

ROUTE 39 / PLANNING CARD

Florida Keys Overseas Highway

Use with the preceding route map.

THE DRIVE

Travel from Key Largo to Key West on US 1 as the landscape opens into a chain of islands and sea crossings. Build in days for the Upper Keys, Marathon and the Lower Keys so the bridges become part of a holiday rather than a long transfer.

DISTANCE + DRIVING

98 miles | 3 hours. Allow additional time for stops and delays.

WHEN TO GO

Winter and spring are popular; late-summer and autumn plans need particular storm flexibility. Weather can affect water excursions in any month.

ACCESS + CONDITIONS

US 1 is the main road through the island chain, so traffic delays deserve a time buffer. State parks can reach capacity. Confirm excursion availability, park works and weather separately; no 2027 booking is implied.

SERVICES

Key Largo, Islamorada, Marathon and Key West are useful service bases. Reserve lodging and allow parking time.

ALTERNATE

Move a boat outing to a different day if conditions change, choosing a shore-based activity from the same base instead.

SCENIC STOPS

A. John Pennekamp Coral Reef State Park; B. Bahia Honda State Park. See the 50 Scenic Stops guide for visit notes.

09 Holmwood LA 27 / LA 14

NPS / © OpenStreetMap contributors | https://www.openstreetmap.org/copyright | Natural Earth

ROUTE 40 / PLANNING CARD

Creole Nature Trail: Coastal Core

Use with the preceding route map.

THE DRIVE

Travel from the Sulphur side of the coastal prairie through marsh country toward Holly Beach, Cameron and the Cameron Prairie refuge. This is a wildlife-watching drive that rewards binoculars, supplies and a generous daylight margin.

DISTANCE + DRIVING

83 miles | 2.5 hours + ferry travel. Allow additional time for stops and delays.

WHEN TO GO

Cooler months are a good choice for long outdoor stops. Heat, mosquitoes, storms and high water can affect the experience in other seasons.

ACCESS + CONDITIONS

Check Louisiana DOTD ferry status, current vehicle limits and refuge/road notices before leaving. This is the coastal core without the eastern and western spurs. Visitor centers do not necessarily open daily; 2027 ferry operations are not guaranteed.

SERVICES

Carry water, food and insect repellent; fill the fuel tank before leaving the larger towns. Facilities are limited between communities.

ALTERNATE

If the ferry or coastal road is unavailable, visit one accessible refuge from the Lake Charles side and revise the loop instead of improvising.

FERRY CROSSINGS

Cameron Ferry. Confirm the operator's current timetable, fares and vehicle limits before departure. Allow for boarding and waiting time.

SCENIC STOPS

A. Cameron Prairie National Wildlife Refuge Visitor Area. See the 50 Scenic Stops guide for visit notes.
